Deliver...

Distribute reports and report files to PCs, LANs and WANs or EMAIL them anywhere! Reports arrive in PC document formats such as WORD, EXCEL, HTML, WORDPERFECT, LOTUS or Adobe’s ACROBAT PDF. Simplify the process of sectioning, bursting, printing, formatting, delivering and archiving reports. Instead of being printed, forward reports onto WINDOWS servers and PC clients in original spooler format and/or any of the formats just mentioned. Get your users what they want, when they want it…in useful formats they understand!
